Power term €/kW month	2,937387	P1	Pc ≤ 15kW
	0,782029	P2	
	1,236675	P1	Pc > 15kW
	0,960609	P2	
	0,460272	P3	
	0,386457	P4	
0,246465	P5		
0,181711	P6		

Energy term €/kWh	0,312195	Pc ≤ 15kW
	0,322500	15 < Pc ≤ 30kW
	0,309200	30 < Pc ≤ 50kW
	0,297600	50 < Pc ≤ 100kW
	0,288000	Pc > 100kW

The variations that occur in the regulated components that are applicable to it, as well as new ones that may appear, will be transferred to the customer, both upwards and downwards. For this purpose, the consumption profile P1=28%, P2=26% and P3=46% for Pc 15kW and P1=12%, P2=14%, P3=13%, P4=14%, P5=5% and P6=42% for Pc > 15kW will be considered. Likewise, the terms of power and energy may be updated, every 1 January, with the value of the real CPI (Last National Annual Consumer Price Index officially published at the time of the update)

Any other charges that the distributor may make as reactive energy, excess power, rental of measuring equipment, rights, etc., will also be transferred to the customer.

The discounts indicated only affect the energy consumed (or the energy consumed at the indicated time, if specified).

For power, the time periods will correspond to those of your access tariff.

Electricity shall be billed according to the consumption as indicated by the distribution company pursuant to the hourly curve load. If this curve is not available at the time of billing for the electricity, this shall be distributed hourly by the distribution company using the estimated consumption pursuant to the official public consumption profile published by Red Eléctrica de España (www.ree.es) for the relevant access tariff. You can check the curve applied to each invoice at www.endesaclientes.com.

The customer can change the option at any time and will affect the entire billing cycle in progress and following.

For billing on paper, the periodicity will be every two months. For electronic invoicing the customer can choose between monthly and every two months (by default monthly, unless the supply was already in Endesa, in which case the previous periodicity will be respected). The periodicity will always be monthly for invoicing by maximeter.

This offer requires the hiring through the web or App of Endesa and having an electric invoice.

To the electricity prices will be added the regulated cost associated with the financing mechanism of the social bonus: Fixed cost per customer (commercialization) of 0.03671762 €/day (Peninsula and Balearic Islands: 0.03874627 €/day including taxes for power lower than 10kW and, for the rest of cases, 0.04465046 €/day including taxes; Canary Islands: 0.03690121 €/day including taxes for power lower than 10kW and domestic customer and, for the rest of cases, 0.03800824 €/day including taxes)

For peninsular supply points, the regulated cost of financing the gas ceiling established in RDL 10/2022 will also be added to the electricity prices. This measure approved by the Government establishes a cap on the cost of gas that is applied to the generation of electricity, and among other aspects, supposes an additional regulated cost to finance the measure itself. This regulated cost will be included in the invoice under the concept "Cap cost of gas RDL 10/2022".

Pc = Power by contract. Prices without taxes. The electricity tax (0.5% or the minimum amount of 0.5 €/MWh or 1 €/MWh, as appropriate) will be added. To the result, VAT (21% or 5% as appropriate) will be added, IGIC (Canarias: 0% or 3%, and 7% as appropriate) or IPSI (Ceuta and Melilla: 4% and 1% as appropriate). Applicable access tariff: 2.0TD or 3.0TD. Type of customer: Residential, Business, Homeowners associations. Document edit 29/07/2022. Offer applicable in contracts between 01/08/2022 and 31/08/2022.
