Solid financial leverage and strong liquidity position

- Leverage (net debt/equity) 0.4
- Endesa liquidity excluding Enersis covers 41 months of debt maturities
- Enersis liquidity covers 15 months of debt maturities

(1) Includes payments/collections from CNE settlements in 9M 2012.
(2) Includes only Mainland tariff deficit securitization
Spain: regulation update (I)

- Decrease of distribution remuneration
- 10% reduction on national coal volumes and capacity payments
- Decrease of non-mainland generation remuneration

RDL 13/2012 and RDL 20/2012

- Direct impact
- Potential claim of historical financing (non-recurring) ≈ + €80 M / €100 M

Supreme Court resolution on social bonus

Full year impact

≈ - €396 M

Tariff deficit

- Latest 2012 CNE settlement: €3.6 bn tariff deficit (renewable subsidies: +24%\(^{(1)}\))
- All technical procedures completed to securitize €7 bn\(^{(2)}\) transferred to FADE
- Private placement: €77 M in October (€34 M for Endesa)
- Private placement: €112 M in November (€44 M for Endesa)
- Total securitization in 2012: €3.5 bn (€1.8 bn for Endesa)

---

(1) Compared to same CNE settlement of previous year
(2) Includes €2.5 bn 2010, €3 bn 2011 and €1.5 bn ex-ante 2012 deficit.
Spain: regulation update (II)

Measures announced on September 14th to eliminate tariff deficit

- 6% tax on electricity generation  \(\approx - €1.4 \text{ bn} \quad \approx - €0.3 \text{ bn}\)
- “Green cent” tax on coal, fuel-oil and natural gas  \(\approx - €1.3 \text{ bn} \quad \approx - €0.3 \text{ bn}\)
- Tax on nuclear waste  \(\approx - €0.3 \text{ bn} \quad \approx - €0.1 \text{ bn}\)
- Tax on mainland hydro generation  \(\approx - €0.2 \text{ bn} \quad \approx - €0.1 \text{ bn}\)
- Thermo solar: no premiums for fossil fuel generation  \(\approx - €0.3 \text{ bn} \quad \text{n/a}\)
- \(\text{CO}_2\) auction proceeds\(^{(1)}\)  \(\approx - €0.5 \text{ bn} \quad \text{n/a}\)
- Externalization of tariff deficit annuities\(^{(1)}\)  \(\approx - €2.1 \text{ bn} \quad \text{n/a}\)

</thead>
</table>

**TOTAL**  
\(\approx - €6.0 \text{ bn} \quad \approx - €0.8 \text{ bn}\)

\(^{(1)}\) Not included within the text proposal sent to the Parliament
A number of improvements to the announced measures are needed according to our opinion

- **Non-mainland generation**: consider the new taxes as costs, to be taken into account in the calculation of its regulated return

- **Domestic coal generation**: consider the new taxes as variable generation costs also to be taken into account in the calculation of its regulated price

- Make the **new taxes temporary** to help resolve the present critical situation

- Introduce a mechanism in order to make sure that new taxes collected are **100% used against tariff deficit**

- Apply taxes also to **electricity imports** and do not apply them to electricity exports

- **Reduce taxes** on nuclear and hydro, while properly addressing excessive costs of certain renewable technologies (solar)
Regulatory changes in concessions and industry tax charges aiming to reduce the tariffs up to 20%

No expected impact for Endesa’s subsidiaries: concessions to be renewed after 2020

President signed and sent to the Senate the “Electrical Highway” and “SIC-SING Interconnection” bills.

Renewables: Government suggested to maintain “10/2024” targets

Government outlined new regulatory model:
- No nationalization of the sector
- “Cost plus”: ROE-based tariff setting process
- Higher involvement of the Government in monitoring electrical services quality level
- CAMMESA only fuel supplier
Enersis capital increase update: progress to date and tentative calendar

Recent milestones achieved:
1. Independent appraisers issue their report
2. Independent Directors Committee issue its report on the transaction
3. Directors individually give their opinion about the transaction
4. Board calls Extraordinary General Meeting of shareholders

Next milestones:
5. Extraordinary shareholders’ meeting (December 20th 2012)
6. New shares record date for SVS and SEC
7. Enersis Board of Director extraordinary meeting
8. Preemptive rights offering period
9. Book building (within March 2013)
spain & portugal & others 9M 2012
Highlights in 9M 2012

Regulated business: negatively impacted by latest regulatory measures partially compensated by non-recurrent items

Generation (+7%)(1) with outstanding performance of imported coal (+46%) and nuclear (+14%)

Better liberalized margins supported by higher selling prices and better production / purchases mix

Leadership in supply (39% market share) and ordinary regime generation (38%) and 2nd player in gas supply market (16%)

(1) Mainland. Does not include Portugal
### Resilient results despite challenging business context

Disclaimer

This document contains certain "forward-looking" statements regarding anticipated financial and operating results and statistics and other future events. These statements are not guarantees of future performance and they are subject to material risks, uncertainties, changes and other factors that may be beyond ENDESA's control or may be difficult to predict.

Forward-looking statements include, but are not limited to, information regarding: estimated future earnings; anticipated increases in wind and CCGTs generation and market share; expected increases in demand for gas and gas sourcing; management strategy and goals; estimated cost reductions; tariffs and pricing structure; estimated capital expenditures and other investments; estimated asset disposals; estimated increases in capacity and output and changes in capacity mix; repowering of capacity and macroeconomic conditions. The main assumptions on which these expectations and targets are based are related to the regulatory setting, exchange rates, divestments, increases in production and installed capacity in markets where ENDESA operates, increases in demand in these markets, assigning of production amongst different technologies, increases in costs associated with higher activity that do not exceed certain limits, electricity prices not below certain levels, the cost of CCGTs plants, and the availability and cost of the gas, coal, fuel oil and emission rights necessary to run our business at the desired levels.

In these statements we avail ourselves of the protection provided by the Private Securities Litigation Reform Act of 1995 of the United States of America with respect to forward-looking statements.

The following important factors, in addition to those discussed elsewhere in this document, could cause actual financial and operating results and statistics to differ materially from those expressed in our forward-looking statements:

Economic and industry conditions: significant adverse changes in the conditions of the industry, the general economy or our markets; the effect of the prevailing regulations or changes in them; tariff reductions; the impact of interest rate fluctuations; the impact of exchange rate fluctuations; natural disasters; the impact of more restrictive environmental regulations and the environmental risks inherent to our activity; potential liabilities relating to our nuclear facilities.

Transaction or commercial factors: any delays in or failure to obtain necessary regulatory, antitrust and other approvals for our proposed acquisitions or asset disposals, or any conditions imposed in connection with such approvals; our ability to integrate acquired businesses successfully; the challenges inherent in diverting management's focus and resources from other strategic opportunities and from operational matters during the process of integrating acquired businesses; the outcome of any negotiations with partners and governments. Delays in or impossibility of obtaining the pertinent permits and rezoning orders in relation to real estate assets. Delays in or impossibility of obtaining regulatory authorisation, including that related to the environment, for the construction of new facilities, repowering or improvement of existing facilities; shortage of or changes in the price of equipment, material or labour; opposition of political or ethnic groups; adverse changes of a political or regulatory nature in the countries where we or our companies operate; adverse weather conditions, natural disasters, accidents or other unforeseen events, and the impossibility of obtaining financing at what we consider satisfactory interest rates.

Political/governmental factors: political conditions in Latin America; changes in Spanish, European and foreign laws, regulations and taxes.

Operating factors: technical problems; changes in operating conditions and costs; capacity to execute cost-reduction plans; capacity to maintain a stable supply of coal, fuel and gas and the impact of the price fluctuations of coal, fuel and gas; acquisitions or restructuring; capacity to successfully execute a strategy of internationalisation and diversification.

Competitive factors: the actions of competitors; changes in competition and pricing environments; the entry of new competitors in our markets.

Further details on the factors that may cause actual results and other developments to differ significantly from the expectations implied or explicitly contained in this document are given in the Risk Factors section of the current ENDESA Share Registration Statement filed with the Comisión Nacional del Mercado de Valores (the Spanish securities regulator or the “CNMV” for its initials in Spanish).

No assurance can be given that the forward-looking statements in this document will be realised. Except as may be required by applicable law, neither Endesa nor any of its affiliates intends to update these forward-looking statements.
