1H 2015 Results
Madrid, 28 July 2015

(1) Mainland. Source: REE
(2) Mainland. Source: Endesa’s own estimates
(3) Excluding ancillary services and capacity payments. €47.1/MWh average baseload equivalent (1H 2015).
Regulatory update
Latest regulatory news (I)

Distribution
- New draft Ministerial Order with standard unitary values for investment and O&M
- Allegation period still open
- From first assessment neutral impact

Generation
- Domestic coal:
  - 3rd Draft Ministerial Order to support IED investments sent to CNMC
  - Pending submission to European Commission
- Ministry of Industry approved Foix fuel-gas (520 MW) power plant closure while T.S.O. submitted a recommendation against Colon CCGT (398 MW) closure
- Non-mainland Gx final RD pending to be approved. European Commission already informed

Catalonian Nuclear Tax
- At the request of the Spanish Government, the Constitutional Court has provisionally suspended its application, although a decision on the subject is still pending
- No relevant impact in the short term

SCVP tariff hourly billing
- Starting on 1st October 2015
- Endesa’s systems ready to bill according to new framework
Regulatory update
Latest regulatory news (II) and CNMC settlements

RDL 9/2015

- Decrease in customers’ capacity payments:
  - €250 M annual reduction of system revenues
  - Equivalent to 2.1% average reduction in the electricity bill in 2015 …
  - …and 0.9% average reduction on annual basis in 2016
  - No impact for utilities
  - Implying a reduction of the estimated tariff surplus

- Self-consumption: reduction in access cost, charges and other costs for customers with contracted power < 10 kW

5th CNMC settlement for Year 2015

- €1.5 bn of provisional imbalance of regulated cost/revenues
- Coverage ratio: 76.3% (vs. 58.1% in settlement 5/2014)
- Endesa owns ~20.2% of regulatory working capital receivables

Disclaimer

This document contains certain "forward-looking" statements regarding anticipated financial and operating results and statistics and other future events. These statements are not guarantees of future performance and they are subject to material risks, uncertainties, changes and other factors that may be beyond ENDESA’s control or may be difficult to predict.

Forward-looking statements include, but are not limited to, information regarding: estimated future earnings; anticipated increases in generation and market share; expected increases in demand for gas and gas sourcing; management strategy and goals; estimated cost reductions; tariffs and pricing structure; estimated capital expenditures and other investments; estimated asset disposals; estimated increases in capacity and output and changes in capacity mix; repowering of capacity and macroeconomic conditions. The main assumptions on which these expectations and targets are based are related to the regulatory setting, exchange rates, divestments, increases in production and installed capacity in markets where ENDESA operates, increases in demand in these markets, assigning of production amongst different technologies, increases in costs associated with higher activity that do not exceed certain limits, electricity prices not below certain levels, the cost of CCGT plants, and the availability and cost of the gas, coal, fuel oil and emission rights necessary to run our business at the desired levels.

In these statements we avail ourselves of the protection provided by the Private Securities Litigation Reform Act of 1995 of the United States of America with respect to forward-looking statements.

The following important factors, in addition to those discussed elsewhere in this document, could cause actual financial and operating results and statistics to differ materially from those expressed in our forward-looking statements:

Economic and industry conditions: significant adverse changes in the conditions of the industry, the general economy or our markets; the effect of the prevailing regulations or changes in them; tariff reductions; the impact of interest rate fluctuations; the impact of exchange rate fluctuations; natural disasters; the impact of more restrictive environmental regulations and the environmental risks inherent to our activity; potential liabilities relating to our nuclear facilities.

Transaction or commercial factors: any delays in or failure to obtain necessary regulatory, antitrust and other approvals for our proposed acquisitions or asset disposals, or any conditions imposed in connection with such approvals; our ability to integrate acquired businesses successfully; the challenges inherent in diverting management’s focus and resources from other strategic opportunities and from operational matters during the process of integrating acquired businesses; the outcome of any negotiations with partners and governments. Delays in or impossibility of obtaining the pertinent permits and rezoning orders in relation to real estate assets. Delays in or impossibility of obtaining regulatory authorisation, including that related to the environment, for the construction of new facilities, repowering or improvement of existing facilities; shortage of or changes in the price of equipment, material or labour; opposition of political or ethnic groups; adverse changes of a political or regulatory nature in the countries where we or our companies operate; adverse weather conditions, natural disasters, accidents or other unforeseen events, and the impossibility of obtaining financing at what we consider satisfactory interest rates.

Political/governmental factors: political conditions in Spain and Europe generally; changes in Spanish, European and foreign laws, regulations and taxes.

Operating factors: technical problems; changes in operating conditions and costs; capacity to execute cost-reduction plans; capacity to maintain a stable supply of coal, fuel and gas and the impact of the price fluctuations of coal, fuel and gas; acquisitions or restructuring; capacity to successfully execute a strategy of internationalisation and diversification.

Competitive factors: the actions of competitors; changes in competition and pricing environments; the entry of new competitors in our markets.

Further details on the factors that may cause actual results and other developments to differ significantly from the expectations implied or explicitly contained in this document are given in the Risk Factors section of the current ENDESA regulated information filed with the Comisión Nacional del Mercado de Valores (the Spanish securities regulator or the “CNMV” for its initials in Spanish).

No assurance can be given that the forward-looking statements in this document will be realised. Except as may be required by applicable law, neither Endesa nor any of its affiliates intends to update these forward-looking statements.
