Renewables auctions

**May 2017 RW capacity auction:**
- Capacity auction closed at maximum discount to standard values
- 3,000 MW were awarded, mostly wind (2,979 MW)
- **Endesa** was awarded with 540 MW of wind:
  - €600 M of estimated capex
  - Energy output: ~1,750 GWh/year
  - Capacity to come on stream before Dec. 2019
  - Attractive expected IRR and perfect strategic fit

**New RW capacity auction:**
- To be held today, 26th July
- Up to 3,000 MW of capacity to be awarded. Limited to wind and photovoltaic technologies
- Maximum discount to standard values increased vs. May auction

ENDESA’s contribution to UN Sustainable Development Goals

Main actions developed in 1H 2017

> € 1,000 Million to transform the future of energy: Digitalization and energy solutions

New Business Line to accelerate the energy transformation

- Digitalization
- Energy solutions

Electricity access to all vulnerable customers

- Strong positioning in the last renewable auction in Spain
- 540 MW awarded to ENDESA (20% of auction)
- ~ € 600 MM expected investment

Social Innovation to tackle fuel poverty

- 225 Agreements signed with Local Authorities
- Training on Energy Efficiency Awareness
- Partnerships to find new disruptive solutions

Endesa included in the FTSE4Good Index for its first time

Note: Endesa also contributes to commitments set out by Enel on SDG 4 (Education) and SDG 8 (socioeconomic development)
Implementation of a new cost and margin action plan

Identified actions

- **Costs**
  - **Staff and support functions**: BPO, reorganization, office space optimization...
  - **Supply**: Plan to reduce Cost to Serve and Cost to Acquire through digitalization, process simplification and optimization...

- **Margins**
  - **Retail**: B2B and B2C customer base value management
  - **Integrated margin**: Adoption of upgraded tools for gas and power integrated management

- New action plan already contributing to improve 2017 results with full impact in the next years
Final remarks

Significant improvement of 2Q liberalized business vs. 1Q despite unfavorable market conditions

Positive evolution of the regulated business

Progressing with the EGPE strategic growth plan

L-f-l(1) fixed costs contention as a result of the efficiency plans

2017 targets supported by additional action plan and expected normalization of results

This document contains certain “forward-looking” statements regarding anticipated financial and operating results and statistics and other future events. These statements are not guarantees of future performance and they are subject to material risks, uncertainties, changes and other factors that may be beyond ENDESA’s control or may be difficult to predict.

Forward-looking statements include, but are not limited to, information regarding: estimated future earnings; anticipated changes in generation and market share; expected changes in demand for gas and gas sourcing; management strategy and goals; estimated cost reductions; tariffs and pricing structure; estimated capital expenditures; estimated asset disposals; estimated changes in capacity and capacity mix; repowering of capacity and macroeconomic conditions. The main assumptions on which these expectations and targets are related to the regulatory framework, exchange rates, commodities, counterparties, divestments, increases in production and installed capacity in markets where ENDESA operates, increases in demand in these markets, allocation of production amongst different technologies, increases in costs associated with higher activity that do not exceed certain limits, electricity prices not below certain levels, the cost of CCGT plants, and the availability and cost of the gas, coal, fuel oil and emission rights necessary to run our business at the desired levels.

In these statements, ENDESA avails itself of the protection provided by the Private Securities Litigation Reform Act of 1995 of the United States of America with respect to forward-looking statements.

The following important factors, in addition to those discussed elsewhere in this document, could cause financial and operating results and statistics to differ materially from those expressed in our forward-looking statements:

Economic and industry conditions; factors related to liquidity and financing; operating factors; strategic and regulatory, legal, fiscal, environmental, political and governmental factors; reputational factors and transaction and commercial factors.

Further details on the factors that may cause actual results and other developments to differ significantly from the expectations implied or explicitly contained in this document are given in the Risk Factors section of the current ENDESA regulated information filed with the Comisión Nacional del Mercado de Valores (the Spanish securities regulator or the “CNMV” for its initials in Spanish).

No assurance can be given that the forward-looking statements in this document will be realised. Except as may be required by applicable law, neither Endesa nor any of its affiliates intends to update these forward-looking statements.
